Welcome to AsiaFlux website!

AsiaFlux is a regional research network bringing together scientists from universities and institutions in Asia to study the exchanges of carbon dioxide, water vapor, and energy between terrestrial ecosystems and the atmosphere across daily to inter-annual time scales.

For more details, please refer to the following article :[About AsiaFlux](#)

FORWARD-LOOKING COLLABORATIONS & PROGRESSES

PHASE I 2007-2010

Kickoff Meeting and 1st Seminar of CarboEastAsia
30 Nov – 1 Dec, 2007
Beijing, China
Strategic planning and establishment of sub-programs: SP1, Interdisciplinary joint field investigation; SP2, Networking flux measurements; SP3, Model development, validation, scaling and integration; and SP4, Seminar and science meetings.

1st Workshop on Data Processing & Synthetic Analysis
19-21 Feb, 2008
Seoul, Korea
CarboEastAsia data requirement and database establishment. Collaboration with other A3 "Ecology" program. Call for research proposal for 1st CarboEastAsia special issue.

1st Field Campaign
7-11 July 2008
Fujiyoshida, Japan
Inter-comparison of eddy flux calculation and QCA/DA procedures of three flux networks. Inter-comparison experiment of soil respiration measurement at Fujiyoshida site.

2nd Seminar on ACTS with 7th AsiaFlux Workshop
17-19 Nov, 2008
Seoul, Korea
"Re-thinking Global Change Science: From Knowledge to Policy" AsiaFlux Workshops CarboEastAsia special session: Asian Carbon Trackers' Society (ACTS) – From Implications to Applications. Preparation of 1st special issue.

3rd Workshop on Integrating Field Observations, Remote Sensing, and Modeling
18-20 Feb, 2009
Tsukuba, Japan
Focused on SP2 (Networking flux measurements) and SP3 (Model development, validation, scaling and integration).

4th Field Campaign & ChinaFLUX Training Course
7 July-1 Aug 2009
Haining, China
Capacity building and promoting the communications among scientists; field excursion to Haining Station, training on long-term flux observation & data processing.

1st CarboEastAsia Special Issue in Biogeosciences (BG)

Our efforts on interdisciplinary approaches for understanding biogeochemical-ecological interactions have produced a special issue in BG. The two-stage publication process enabled every discussion paper and interactive comments to remain permanently archived and individually citable (www.biogeosciences.net).

During Phase I, a total of 42 papers were published in Biogeosciences (11), Asia-Pacific Journal of Atmospheric Sciences (4), Ecological Research (2), Remote Sensing (1), Journal of Geophysical Research (1), Nonlinear Process in Geophysics (1), Acta Ecologica Sinica (1), Journal of Plant Research (1), and others (15).

The main topics included in these publications are: advection, Asian monsoon, biospheric models, carbon and water cycle, catchment water balance, cloud effect, drought, ecosystem production and respiration, eddy covariance technique, evapotranspiration, hydrogeology, heterogeneity, leaf nutrient, litter decomposition, mapping, methane exchange, modeling, MODIS, net radiation, nocturnal boundary layer, organic carbon sequestration, parameter optimization, quality control, remote sensing, scale-dependency, uncertainty, and under-story ET.

International Project: From CarboEastAsia to CarboAsia

APN (Asia-Pacific Network): CarboAsia (2013-2016)

[PI: Dr. Akira Miyata]

Expansion of CarboEastAsia to cover whole Asia.

In particular, **tropical/subtropical forests and cropland**

Data integration & synthesis

- Expansion of AsiaFlux Database
- The first AsiaFlux report on the Asian carbon budget and implications for the global carbon cycle
(We are working...)

Capacity development and networking

- Activate national/regional networks
- Cultivate next generation scientists

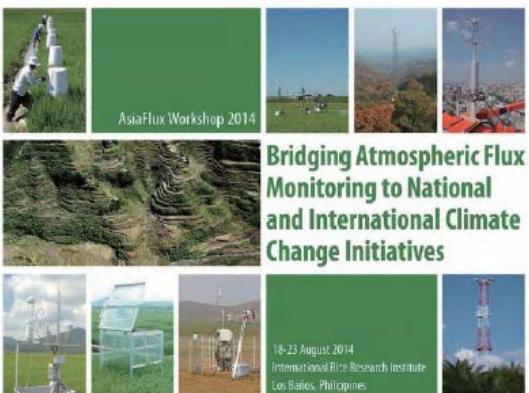

Integration and syntheses of terrestrial ecosystem flux data
in tropics/subtropics and croplands in Asia
by activating regional tower-based observation networks

The joint conference of AsiaFlux Workshop 2017 and the 15th Anniversary Celebration of ChinaFLUX to be held in Beijing, China, on August 17-19, 2017.

The tentative thesis of AsiaFlux Workshop 2017 is "Linking ecosystem flux measurements and carbon management to global change". This workshop features will discuss the scientific challenges on flux measurement and monitoring, couplings cycles of carbon, water and nitrogen, upscaling approaches for regional carbon budget, as well as ecosystem carbon/water management.

As one of important partners of FLUXNET and AsiaFlux, ChinaFLUX will greet the coming 15th Anniversary since 2002. During this joint conference, a series of celebration will be organized for the 15th Anniversary of ChinaFLUX.

⑤ Date & Venue

- Training Course: August 14-16, Institute of Geographic Sciences and Natural Resources Research
- AsiaFlux Workshop 2017: August 17, Beijing International Convention Center
- The 15th Anniversary Celebration of ChinaFLUX: August 18, Beijing International Convention Center
- Field Excursion: August 19, Yucheng site

⑤ Important Dates

- **March 05, 2017:** Open for Registration & Abstract submission
- **June 30, 2017:** Deadline for training course application
- **July 20, 2017:** Deadline for ONLINE registration & Abstract submission
- **July 20, 2017:** Deadline for field excursion

AsiaFlux Activities

- International joint project
- Workshop
- Training course

Issues:

a. Joint project is mainly for travelling, and most of actual measurement are voluntary-basis.
(= site observation is based on site PI's funding)

AsiaFlux data status

- Registered site
- Data availability
- Contribution to FLUXNET2015

AsiaFlux Registered Sites [Site-Registered]

107 sites

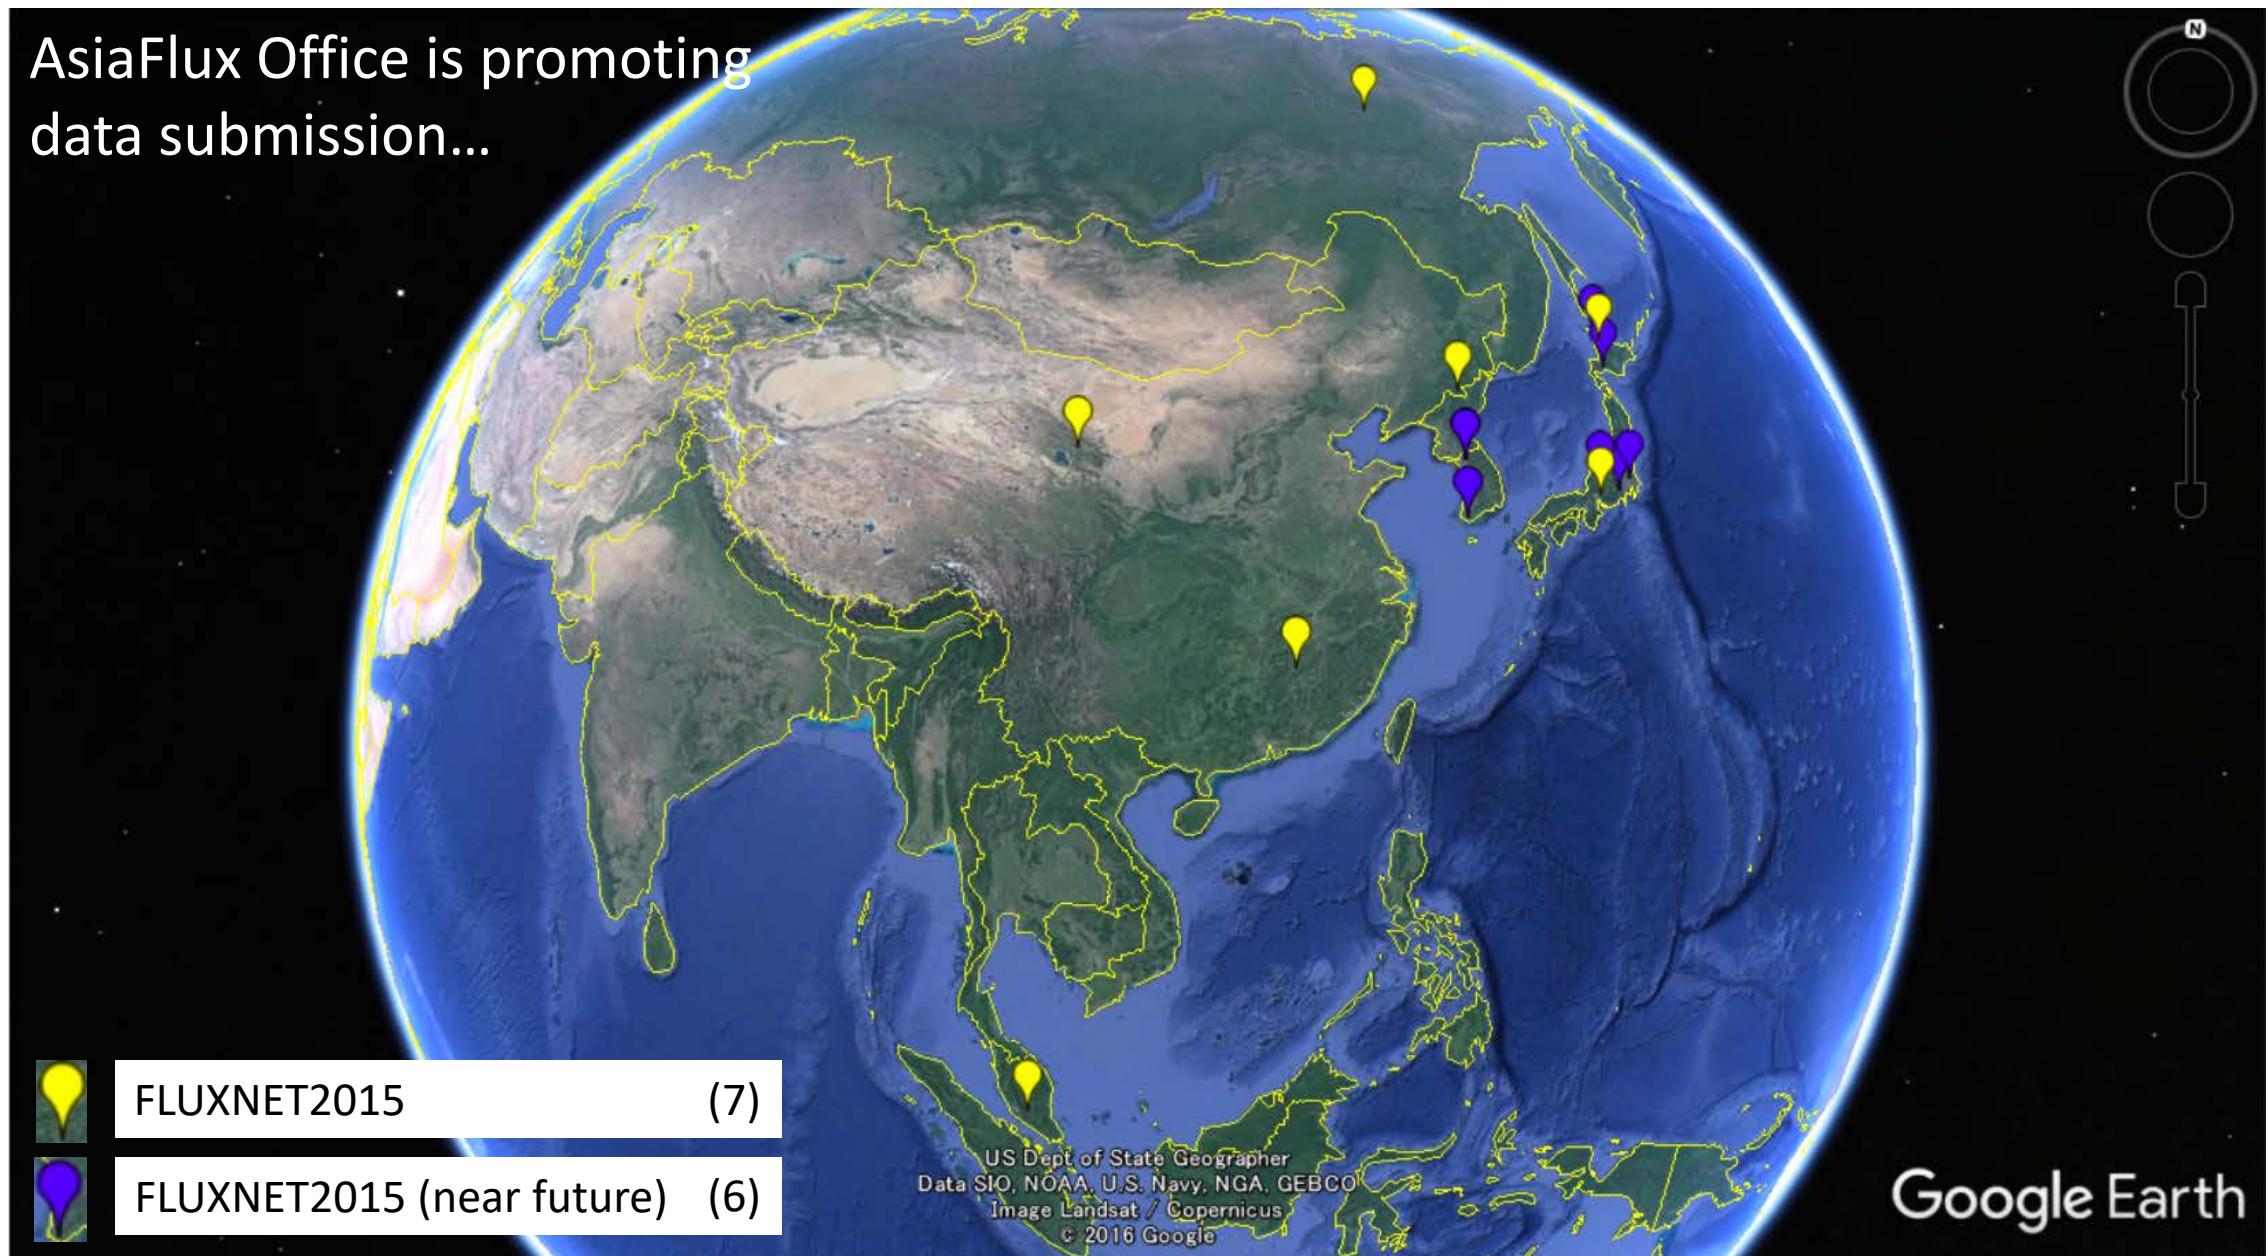

AsiaFlux Registered Sites [Data on AsiaFlux DB]

36 sites

AsiaFlux Contribution to FLUXNET2015

AsiaFlux Office is promoting
data submission...

AsiaFlux data status

- Registered site
- Data availability
- Contribution to FLUXNET2015

Issues:

- a. Not many sites data publically available.
 - Voluntary basis, No strong obligation
 - Publication first
 - Little experience in data sharing?

Situation is slightly changing.. (personal feeling by KI)

Scientific Progress

- Site data synthesis
[Yu et al. 2014 PNAS; Kondo et al. 2017 AgForMet]
- Data-Model Intercomparison (MIP)
[Saigusa et al. 2013; Ichii et al. 2013; J. For. Res.]
- Data-driven CO₂ fluxes, top-down vs bottom-up synthesis
[Ichii et al. 2017; JGR-biogeosci]
- SE Asia network
[Hirano et al.]

Synthesis of AsiaFlux data

AsiaFlux upscaling shows
closer seasonal variation with
GOSAT in Siberia/East Asia.

Gaps remain in S. Asia and SE Asia.

Flux towers across tropical peatlands in SE Asia

- About 15 towers in Indonesia and Malaysia for CO₂, energy and CH₄ fluxes
- In intact peat swamp forest (PSF), drained PSF, logged PSF, burnt ex-PSF and young and mature oil palm plantations

Oil palm
[Hirano et al.]

Summary

AsiaFlux site summary:

107 sites registered

36 site data in AsiaFlux DB (accessible)

13 site data to FLUXNET 2015 (7 sites done; 6 sites near future)

Issues:

Funding for international collaboration

Long-term funding

Maintaining existing sites

Scientific Outputs:

Cross-site synthesis

Model comparison

Upscaling (Data-driven estimation)

Top-down vs bottom-up synthesis

Network across SE Asia for environmental change detection
