

# THE GREAT THERMAL BAKE-OFF

*A Hands-On Workshop for Enhancing Temperature Measurement Precision and Standardization for Improved Flux Interpretation and Application*

## Workshop Goals:

1. Cross-Instrument Comparison & Standardization: Establish and test processing standards for thermal instruments through a field campaign, encompassing preprocessing, installation, and post-processing, to ensure consistency and reliability across devices.
2. Build Community Engagement around a Thermal Cam Network: Enhance the accessibility and usability of thermal data within the broader scientific community, fostering a supportive network for sharing and innovation.

## When:

August 13th - 16th, 2024

## Attendance:

Application form

<http://tinyurl.com/TGTBapp>

Virtual options will be available.

## Where:

Northern Arizona University's  
Hat Ranch Field Station  
Flagstaff, AZ, USA

## Applications Due:

April 5th, 2024
