

## PROPOSAL FOR FLUXNET SYNTHESIS PUBLICATION

**Initial coordinators::** Renduo Zhang  
**Collaborators needing access to data:** Renduo Zhang, Zhiyuan Zhang, Juan Zhu  
**Affiliations:** Sun Yat-sen University, Guangzhou, China

### DATASET PROPOSED

**LaThuile or Opened Access:** La Thuile

### TITLE OF PAPER AND OUTLINE

**TITLE:** The Controlling Factors of Temperature Sensitivity of Soil Respiration

**Description:** With the La Thuile Data set, We want to identify the value of temperature sensitivity of soil respiration and its correlation with temperature in a large scale. Then find the impact of factors by both a statistical approach and a mathematical model.

### PROPOSED SITES TO BE INVOLVED

**List of sites or criteria:** All the cropland, shrubs, savanna, forests and grassland sites.

### PROPOSED RULES FOR CO-AUTHORSHIP

**What is requested to the PIs to be co-author**

1. All the items listed at FLUXNET should be read and familiar.
2. Data policy and terms of reference must be obeyed.
3. The co-author must provide true data or take practical and significant efforts.
4. Honesty and Truth should be always observed. .
